# Go the Distance with Unlimited Durability.

**Here's a fact that may surprise you.** Some people want their display to last forever. Not surprised? Neither are we. Lasting performance is what the Downing Unlimited Folding Panel System is all about. You want results on the exhibit floor. You want your exhibit to assist you as you meet prospects, buyers and build better relationships with more people, show after show.

The Downing Unlimited is built to withstand the rigors of the trade show circuit — and you know what that is like. Its patented, 360-degree folding hinge is so durable it is guaranteed for the life of the exhibit. Set-up and tear down are quick and easy. The panels are finished front and back, giving you the option to change color and configuration. There is a long road waiting out there; choose the Unlimited for flexibility, durability and enduring performance.

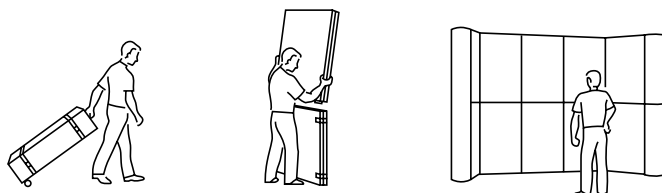

**Custom Look.** Available in multiple sizes of backwall and island configurations. Customizable with lighting, headers, graphics, shelves and more.

**Durable.** Our rugged construction and patented 360-degree internal hinge is guaranteed for the life of the exhibit.

**Reversible.** The front and back of the panels are finished with your selection of loop fabric.

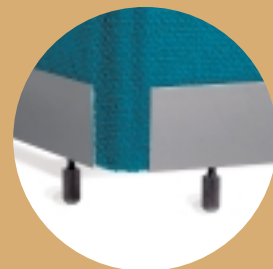

**Simple Assembly.** One person without tools can assemble the display. (see below)

Patented 360-degree internal hinge for flexible configuration

Retractable pins, easy stacking of panels

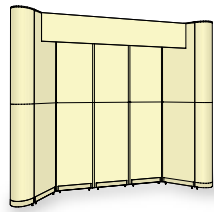

Adjustable feet for uneven surfaces and wire clearance

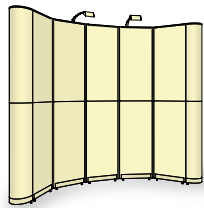

Displays pack into rugged rolling cases, compartmentalized to prevent display damage.

# Unlimited Flexibility.

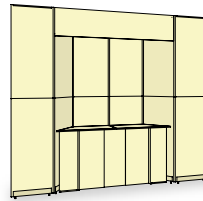

**Let us spark your imagination.** Downing's Unlimited folding panel exhibit system offers an endless range of choices. For any small to medium-sized space Unlimited can create an unsurpassed presence. Here is a small sample of the range of configuration options possible with the Unlimited exhibit system.
